

Road-dust issue dominates September NFLA meeting

Posted Sept. 24, 2008—North Fork Landowners' Association members voted to mail out two letters concerning the North Fork Road at the association's Sept. 6 business meeting at Sondreson Hall.

One letter supports Glacier National Park's decision to repair washed-out portions of the inside North Fork Road. Opening of that road would ease traffic somewhat on the North Fork Road, and provide an escape route in case of wildfire. The other letter urges the Flathead County Board of Commissioners to take a proactive position with regard to the maintenance of and dust abatement on the North Fork Road.

For details, see **Meeting Minutes**.
