

Road improvements completed

Updated Dec. 17, 2009—Dave Prunty, Public Works Director for Flathead County, reports that the Resource Advisory Committee (RAC) project for North Fork road improvements has been completed. There are some spots, however, that the county knows to still be "soft". Their plan is to monitor these areas and complete maintenance in the spring after breakup.

Prunty also reported that the county is performing routine maintenance on the NF road culverts this winter including, in some instances, replacing and installing.

For more information about activities related to the North Fork road, see the **[North Fork Road webpage](#)**.
